Front Panel

The screenshot shows a graphical user interface for a file transfer process. At the top right, there is a button labeled "ReceiveFile" and a green circular indicator with a starburst pattern. Below this, a label "XComCRC._XMCommCRC" is visible. The central area is a black terminal window with a blue border, containing the text "Using Checksum" at the top, "Total bytes: 6016" on the left, and "6016" on the right. Below the terminal, there is an "error out" section with a "status" field containing a green checkmark icon and a "code" field containing "0". A "source" field is present below the status and code fields. To the right of the error out section, there is a label "TransferStatus 2" and a value "1000" displayed in a light orange box.
